## How We Can Help...

Waste audits are important for building the foundation of an effective waste management strategy and are a critical component of operating a sustainable building.

**Reclay StewardEdge** will go beyond just a waste audit, and provide your business with value added products including pre-audit, on-site, and post-audit activities.

RSE's methodology follows requirements from leading sustainable building certifications, guaranteeing that your audit report will meet the standards of certifications such as **LEED Canada** and **BOMA Best**. RSE's recommendations will help facilitate building management decision-making.

RSE has COVID-19 safety procedures in place, following all current provincial health guidelines including the use of personal protective equipment and social distancing best practices.

### Pre-Audit Activities

- Pre-audit assessments
- Detailed audit plan

### On-Site Activities

- Full service on-site collection and sorting for duration of audit
- Qualitative and quantitative analysis

### Post-Audit Activities

- Comprehensive waste audit report
- Expert recommendations

## Our Expertise...

**Reclay StewardEdge** is your Manitoba expert for waste audits, resource and materials management strategies, recycling program development and management, and reporting and compliance management.

Our team has over a decade of experience in waste audit planning, reporting, recycling initiatives, and waste diversion strategy.
